

TAKING CARE OF YOUR COFFEE

COFFEE STORAGE IN THE BEST CONDITIONS, ENSURING A LONGER SHELF LIFE

- Acclimatized warehouse: controlled humidity and temperature
- Clean air
- Pest Control

Coffee is a *hygroscopic product*. It can absorb and desorb water from its environment. The structure of the green beans changes, resulting in microbiological and enzymatic reactions. At SEABRIDGE, green coffee reaches its equilibrium when no absorption or desorption occurs. *Shelf life* will be at its longest.

PROFOUND QUALITY CONTROL IN OUR LABO

- On-site *laboratory* for sensorial and physical green coffee assessment
- 100% *aligned* with international *regulations* & standards
- All samples are *barcoded* & stored for minimum 14 months
- *Q-grader* on-site and *Q-grading seminars* are offered in partnership with CQI (SCA standard)

EXPERTISE IN COFFEE HANDLING

- *Dedicated handling* in case of damage or quality issues
- Trained & experienced *personnel*
- *Machinery* on-site (screen size, density, color, etc.)

Ivan Lamilla Muñoz,
Green Coffee Quality Specialist &
Q-grader since 2004

FULLY TRACEABLE AND FLEXIBLE LOGISTICS SOLUTION
